

ATOMOS SPYDER

Developed in partnership with **datacolor**

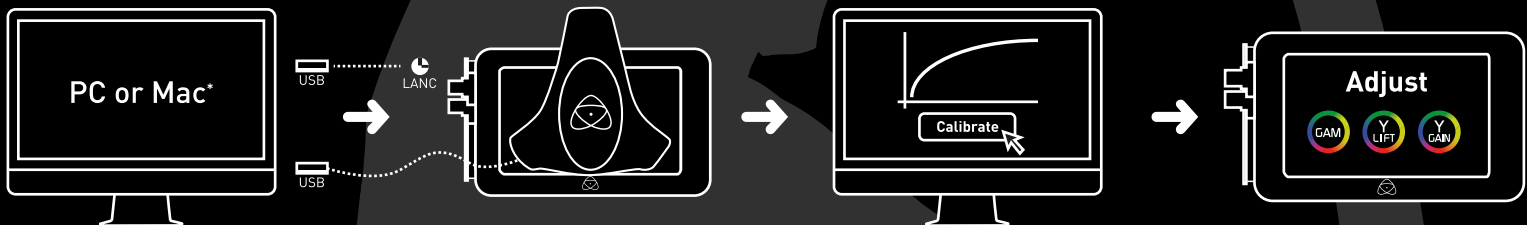

Accurate colors at the camera saves time in Post.
Discover the world's first affordable Monitor calibration system.

Color Calibration on the fly
149\$ 89€ 109€ 16800¥
 Blade sold separately

Calibrate anywhere, anytime in three easy steps.

Monitors drift in color and only expensive monitors can be calibrated. AtomOS and the **SAMURAI BLADE** solve this problem. Trust your colors on location and avoid costly color correction in Post.

What's included with the ATOMOS SPYDER:
 → ATOMOS SPYDER → LANC TO SERIAL CABLE

ATOMOS SPYDER features at a glance:

FEATURES	ATOMOS SPYDER	
Calibration	Rec. 709	D65 white point
C-Log		
Custom		
	Calibrate every 2 weeks for accurate colors in the Studio or on location for an accurate profile.	

*Mac software available in December 2013

LANC to serial cable also sold separately for existing Datacolor Spyder customers.
